Approval of minutes	Minutes from 3/4/15	Approved as submitted.
The order and priority of topics are subject to change based on conflicting meetings of interested persons.		

PRIORITY TOPICS

AGENDA TOPIC	ACTION POINTS	STATUS
--------------	---------------	--------

Protocol/Scope Review	Nitrous oxide use in EMS	Discussion/Update/Complete
<p>4/7/15: Andrews working on guideline.</p> <p>3/4/15: Further discussion about nitrous oxide. Still concern about lack of proof of safety for caretakers. It is recognized that there are agencies out there who wish to use it and it is recognized that there are services across the country that use it without any documented problems. A motion was made to approve at AEMT, intermediate, and paramedic level with **. Yes: 6 No: 0 Abstain: 1. Recommendation will be forwarded to the office.</p> <p>It was also agreed that PAC will formulate a guideline on its use. Andrews will take lead. Others to provide info to Andrews. Andrews will share with group via email by April 15th, midnight.</p> <p>12/2/14: Further discussion about nitrous oxide. There is still a consensus that need for further data on safety for providers. NO is in the NHTSA Scope at AEMT level and taught in AEMT classes. Need to understand two separate issues: patient care and level for scope; safety for providers. There was a lot of discussion about safety. A motion was made to approve at AEMT and Intermediate level. Yes: 4, No: 3. Motion passed. 6</p> <p>6/3/14: Motion to add nitrous oxide to AEMT and Intermediate scope with **. After much discussion, there was concern that there wasn't enough time to fully discuss this issue. Motion withdrawn and will add to next agenda.</p>		

Protocol/Scope Review	Medication Assisted Advanced Airway	Discussion/Update/Complete
<p>4/7/15: MacNeal circulated some drafts. Powerpoint, sample guideline and medical director resource. MacNeal still receiving comments and discussion via email with plan to present final draft for PAC review.</p> <p>Motion: PAC to provide supporting material, educational material, and references for any sample guidelines developed by PAC from here to the future. Yes 7 No 0</p>		

3/4/15: MacNeal provided information that he gathered in querying other states' experience with RSI.
Medication Assisted Advanced Airway- with or without paralytics with two advanced airway trained providers at patient side (at least one being a paramedic) (requires continuous ETCO2 waveform capnography)**

Replaces both:

Intubation- Medication Assisted (non paralytic)*

Intubation- Medication Assisted (paralytic) (RSI)**

YES: 7 NO: 0 Motion carries

PAC will formulate a guideline on training and education. MacNeal will take charge of this. He will develop and provide to PAC for email discussion by April 15th.

12/2/14: There was considerable discussion regarding the issues: 1 vs 2 to do RSI, medication assisted intubation as a work around, ETCO2 monitoring required

Motion: Medication assisted intubation including paralytics requires continuous ETCO2 monitoring and allowed with 1 paramedic to replace the two paramedic rule regarding RSI.** There was considerable discussion after motion as well. **Vote: Motion was withdrawn.**

10/15/14: Board returned topic to PAC for more discussion.

10/14/14: medication assisted medication and RSI: motion: remove rule requiring two paramedics at patient side for RSI: vote: favor: 6 opposed: 1

Protocol/Scope Review	Define/change the paramedic curriculum medication list	Discussion/Update/Complete
<p>4/7/15: The current paramedic curriculum medication list and the additional approved paramedic medications list was distributed prior to the meeting for review. At this meeting the group discussed the need and implications of updating these lists. Specifically, should any of the add'l approved medications be moved to the paramedic curriculum list? There was a new discussion about approving drug categories as opposed to specific names. The consensus was that categorization makes sense, but some concern that moving a medication to the standard curriculum list will take it away from the ability to charge for SCT. Members to consider these lists further and to bring recommendations back to the next meeting.</p> <p>3/4/15: deferred to next meeting</p> <p>10/14/14: paramedic curriculum medication list compiled by the office: list of medications being used by paramedics is getting long. Should we consider adding some of these to the curriculum or update the list. Office to provide PAC with current paramedic medication list and medications currently in curriculum.</p>		
Field Medical Oversight MD-1	Dr. MacNeal	Discussion/Update/Complete
<p>3/4/15: Cady presented his physician response outline. PAC reviewed and discussed. Clarifications were made. Document sent to all members for further review and plan discussion at next meeting.</p>		
Scope of Practice	Mechanical CPR Devices for EMR	Discussion/Action
<p>4/7/15: PAC previously recommended adding mechanical cpr device to EMR scope **. After further discussion a motion was made to add mechanical CPR device to EMR with **. Yes 6 No 0 Abstain 1</p>		
Scope of Practice	Zofran for Intermediates	Discussion/Action
<p>4/7/15: Request from Marquette County to add Zofran for use by intermediates. Motion to move zofran to the intermediate scope of practice with**. Yes 6 No 1</p>		
Scope of Practice	Multipurpose Ventilators	Discussion/Action
<p>4/7/15: Automatic Transport Ventilator (ATV) vs Variable Setting Ventilator (VSV). Variable setting has to this point been for the critical care paramedic only. Several agencies have requested the ability to utilize the variable setting ventilator by paramedics. Motion: allow paramedics to use a VSV in a simple manner allowing for setting of FiO₂, rate, and volume only in assist control (AC) setting. Yes 5 No 0 abstain 2</p> <p>There was further discussion about allowing a paramedic to use a VSV to match the settings of a patient's ventilator for an inter-facility transport.</p>		

Questions: What is a "chronic vent" patient? What settings are typical?		
Scope of Practice Administration	State Border Limitations	Discussion/Action
4/7/15:		
ADDITIONAL TOPICS		
AGENDA TOPIC	ACTION POINTS	STATUS
EMS Board/Office Assignments	Requested Topics:	Standing Agenda Topic
Protocol Review	Current protocol examples on website	Update/Review
Policies Updates	L&S PAC Position Statement	Update
3/4/15: In process with DHS for posting 10/14/14: PAC lights and siren position still not posted on website Lights and siren position paper not posted. Office to post. 10/8/13: no new updates PAC Use of Lights and Sirens position paper. Not on website as of 10/1/13.		
Best Practices Recommendations	PAC list of discouraged medications, equipment or practices with recommended alternatives.	Active
3/4/15: Waveform capnography should be standard for any service/provider that is using an advanced airway. Motion made to remove * from ETCO2 monitoring at all levels on scope of practice. No second. Motion does not stand. For all levels that perform endotracheal intubation, ETCO2 waveform is required. This will be required immediately for new services and by January 1, 2020, for all services. Motion: INTERMEDIATE TECHNICIAN, INTERMEDIATE, PARAMEDIC SCOPE OF PRACTICE Endotracheal Intubation requires continuous ETCO2 waveform capnography (for any new increase in service, for all services by 2021). Yes: 7 No: 0 Motion carries		
6/3/14: HEMS utilization guideline: what is the status? Still in Department approval process. Fred to f/u on status.
