

## ACUITY INDEX

Personally identifiable information is collected to assist HIV case managers in planning and coordinating services for persons with HIV infection (and will be used only for that purpose). Completion of this assessment is voluntary however to determine case management eligibility and service level an acuity score is necessary. This assessment must be completed on an annual basis for Acuity Level 1 and 2 clients, every 180 days for Acuity Index Level 3 clients, and/or as life circumstances change.

### GENERAL INFORMATION

Client – Name	Client - ID Number	Date of Completion
Case Manager – Name	Agency Name	Expiration Date ( <i>maximum 12 months from Date of Completion</i> )

### HIV CARE CONTINUUM: WEIGHTED

Category	Level 0 (0 pts.)	Level 1 (3 pts.)	Level 2 (6 pts.)	Level 3 (9 pts.)
<b>1. Linkage and Retention in HIV Medical Care</b>  <input style="width: 30px; height: 30px; margin-left: 5px;" type="checkbox"/>	Consistently engaged in HIV medical care.  Attends HIV medical appointments as dictated by treatment plan.	Attended more than 50% of scheduled HIV medical appointments in the last 6 months.  Requires minimal assistance accessing and maintaining engagement in HIV medical care.	Attended less than 50% of scheduled HIV medical appointments in the last 6 months.  Newly diagnosed and engaged in HIV medical care less than 6 months.  Requires moderate assistance accessing and maintaining engagement in HIV medical care.	Has not attended HIV medical appointment in the last 6 months.  Newly diagnosed and has not scheduled or attended any HIV medical appointments within three months of diagnosis.  Recently released from the DOC needs to reestablish HIV medical care in the community.  Transitioning from pediatric to adult HIV medical care and services.  Requires immediate and/or intensive assistance accessing and maintaining engagement in HIV medical care.
<b>2. Adherence to Antiretroviral Therapy (ART)</b>  <input style="width: 30px; height: 30px; margin-left: 5px;" type="checkbox"/>	Consistently adherent to ART with undetectable viral load (<200 copies/ml).  Long-term non-progressor: viral load controlled without ART.	Prescribed ART and has undetectable viral load but some concerns regarding adherence (medical provider raises concerns or client reports missing 5 or more doses in a month).  Starting or restarting ART and client and/or medical provider voice no concerns regarding ability to adhere.  Requires minimal support and/or education in order to maintain adherence.	Prescribed ART and has detectable viral load with CD4 count > 200.  Starting or restarting ART and client and/or medical provider voice some concerns regarding ability to adhere.  Requires moderate support and/or education in order to maintain adherence.	Prescribed ART and has detectable viral load with CD4 count < 200.  Refuses to take ART against medical advice.  Starting or restarting ART and client and/or medical provider voice strong concerns regarding ability to adhere.  Medical provider does not recommend starting ART due to strong concerns regarding client's ability to adhere.  Requires immediate intervention and/or intensive support and education in order to maintain adherence.

Category	Level 0 (0 pts.)	Level 1 (2 pts.)	Level 2 (4 pts.)	Level 3 (6 pts.)
<b>3. Other Medical Needs</b>  <input data-bbox="73 228 128 282" type="checkbox"/>	Medically stable.  No acute co-infections or other chronic medical conditions.	Chronic medical conditions other than HIV that are currently controlled with medication and/or other treatment.  Presence of acute co-infections that are being treated.	Multiple chronic medical conditions other than HIV for which treatment needs to be established.  Presence of untreated acute co-infections.  Requires less than 10 hours per week of in-home assistance with ADLs due to medical.	Multiple chronic medical conditions and/or acute co-infections currently untreated due to clients' inability or refusal to comply with treatment plan.  Requires more than 10 hours per week of in-home assistance with ADLs due to medical conditions.  Pregnant or delivered in the past year.  Currently experiencing medical crisis.
<b>4. HIV/STI Risk Reduction</b>  <input data-bbox="73 667 128 721" type="checkbox"/>	Strong understanding of risk reduction.  Abstaining from risky behaviors.	Adequate understanding of risk reduction.  Engaging in protective practices that reduce risk to self and others the majority of the time.  No recent STIs.	Moderate understanding of risk reduction.  Engaging in protective practices that reduce risk to self or others about half of the time.  Reported STI in the past year.	Little or no understanding of risk reduction.  Unable and/or unwilling to engage in protective practices that reduce risk to self or others.  Significant cognitive, physical, and/or emotional barriers to engaging in protective practices.  Ongoing history of STIs.
<b>5. Health Literacy</b>  <input data-bbox="73 1024 128 1078" type="checkbox"/>	Clear understanding of HIV disease, treatment, and service availability including health insurance and benefits.  Strong self-advocacy skills (w/ providers).  Confident in ability to navigate systems of care (includes following clinic/pharmacy procedures, filling out paperwork, etc.)	Basic understanding of HIV disease, treatment, service availability, health insurance, and benefits.  Moderate self-advocacy skills (w/ providers).  Requires minimal assistance navigating systems of care.	Limited understanding of HIV disease, treatment, service availability, health insurance, and benefits.  Poor self-advocacy skills (w/ providers).  Requires moderate assistance navigating systems of care.	Uninformed about HIV disease, treatment, service availability, health insurance, and benefits.  Demonstrates denial about diagnosis.  Unable to advocate for self (w/ providers).  Unable to navigate systems of care without intensive support.

<p><b>6. Oral Health</b></p> <p><input type="checkbox"/></p>	<p>All dental needs are being met (routine cleanings every 6 months and restorative care as needed)</p>	<p>Engaged in dental care at least 1 time per year.</p> <p>Has a denture that fit appropriately and attends dental appointment at least once a year for fit adjustment.</p>	<p>Has not been engaged in dental care for more than 1 year.</p> <p>Currently engaged in complex restorative dental plan.</p> <p>Has a denture that does not fit and does not attend dental appointments for fit adjustment.</p>	<p>Emergency dental services required.</p> <p>Refuses dental intervention against medical advice.</p> <p>Prescribed dentures but refuses to wear them.</p>

TOTAL ACUITY	FREQUENCY OF CONTACTS AND SERVICE REQUIREMENTS
<b>0-16</b>	<p><b>SERVICE LEVEL 0</b>  <i>Brief Services/Non-Case Managed</i>; Only <i>reactive</i> contact required; eligibility for services should be re-evaluated at a minimum annually if client is accessing services</p>
<b>17-33</b>	<p><b>SERVICE LEVEL 1</b>                      Minimal <i>proactive</i> contact required; quarterly direct client contact; annual assessment; minimum annual Acuity Index review; biannual review of service plan by case manager and client; annual review of service plan by supervisor</p>
<b>34-55</b>	<p><b>SERVICE LEVEL 2</b>                      Moderate <i>proactive</i> contact required; monthly direct client contact; annual assessment; minimum annual Acuity Index review; biannual review of service plan by case manager, client and supervisor</p>
<b>56-87</b>	<p><b>SERVICE LEVEL 3</b>                      Intensive <i>proactive</i> contact required; twice monthly direct client contact; biannual assessment; minimum biannual Acuity Index review; quarterly review of service plan by case manager and client; biannual review of service plan by supervisor</p>

### SCORING ADJUSTMENTS

If a case manager feels that the client's score on the Acuity Index does not accurately reflect the client's level of need, the case manager (with approval from the Agency Case Management supervisor) may adjust the client's service level based on professional judgment.

The following are examples of situations where adjustments in scoring may be made:

- Currently homeless which significantly impacts client's ability to attend medical appointments and/or adhere to ART
- HIV-related hospitalization in the past 90 days
- Mental health and/or AODA crisis occurring which significantly impacts client's ability to attend HIV medical appointments are/or adhere to ART

Documentation providing justification of the scoring adjustment must be included below or in the client's chart:

Client Service Level (0-3)       Eligible for Case Management ( Y  N)
