SECTION 1 - FEDERAL REGULATION DEFICIENCIES

Section 1 of this report describes the numbers and types of **Federal regulation deficiencies** found during surveys conducted in 2021. "Deficiencies" are cited for noncompliance with Federal regulations. This section also compares these numbers to averages for all nursing homes of similar size.

SECTION 2 - NURSING STAFF TURNOVER AND RETENTION RATES

Section 2 provides information about **nursing staff turnover and retention** rates at this nursing home in 2021. It compares these rates to the averages for all nursing homes of similar size.

APPENDICES (on the internet after 5/1/2022) include:

Appendix A - a list of **resource agencies** for consumers;

Appendix B - information about how nursing staff turnover & retention rates are calculated; and

Appendix C - **statewide averages.**

SECTION 1 - SURVEY RESULTS FOR THIS FACILITY

Nursing homes in Wisconsin operate under rules enacted by the Federal government (for the Medicare and/or Medicaid programs) and by the State of Wisconsin. Surveyors from the Wisconsin Division of Quality Assurance conduct unannounced inspections at each nursing home at least once every 9 to 15 months to determine if the nursing home complies with all State and Federal rules. State surveyors also conduct follow-up visits to ensure that violations have been corrected, investigate complaints, and conduct other surveys as necessary.

When state surveyors determine that a nursing home is not in compliance with a Federal regulation, the nursing home is cited with a violation or "deficiency". The number and type of violations for surveys conducted in 2021 are described in this report. The number of federal regulation deficiencies cited in Wisconsin nursing homes during 2021 surveys ranged from **0 to 84, with an average of 7.8 citations.**

In 2021 survey(s), ASCENSION LIVING ALEXIAN VILLAGE MILWAUKEE, MILWAUKEE, which has 108 licensed beds, was cited with:

8 Federal regulation deficiency(ies)

Statewide, the average number of deficiencies for a nursing home with 100-199 beds was **11.5.**

In addition, this home was cited with **0** federal building safety violations and **0** federal emergency preparedness violations.

The number of federal building safety violations statewide in 2021 ranged from **0 to 26, with an average of 4.8 citations.**

The number of federal emergency preparedness violations statewide in 2021 ranged from **0 to 4, with an average of 0.3 citations.**

Finally, when there is no comparable requirement under federal regulations, nursing facilities may be cited for deficient practices under state regulations. The number of state regulation deficiencies cited in Wisconsin nursing homes during 2021 surveys ranged from **0 to 3, with an average of 0.06 citations.** This home was cited with **0** state regulation deficiency(ies).

Federal Regulation Deficiencies:

To determine Federal regulation deficiencies, surveyors use a resident-centered, outcome-based process. Equal emphasis is placed on the quality of care the resident receives and on the quality of the resident's life in the nursing home, and on whether or not the resident's rights, dignity and privacy are respected. These factors are evaluated by observing residents' care; interviewing residents, families and staff; and reviewing medical records.

If it is determined that a Federal regulation deficiency exists, the deficiency is placed on a grid. Grid placement is based on two measures:

- *Severity/Harm*, the degree of impact that a deficient practice has on residents at the facility; and
- *Scope/Frequency*, the prevalence of a deficient practice within a facility, or the proportion of residents who were or could have been affected.

All Federal deficiencies fit into one of the following four grid levels, from most to least serious: Immediate Jeopardy, Significant Correction, Correction and Substantial Compliance. If this home had deficiencies at any of the four grid levels in the last survey, those deficiencies are listed below. Each deficiency listed is followed by the abbreviation of its federal regulation category: Quality of Care (QC), Resident Services (RS), Quality of Life (QL), Resident Rights (RR), Freedom from Restraints/Abuse (FA), Staffing/Staff Training (ST), Pharmacy/Lab Services (PL), and Administration (AD). **A deficiency may be listed more than once if it was cited more than once during the year. Also, some citations share the same title, so you may see separate citations listed with the same title on the same date.**

Certain Federal regulation deficiencies at the Immediate Jeopardy, Significant Correction and Correction grid levels cause a nursing home to be designated as having "Substandard Quality of Care (SQC)". **This home was designated with SQC during the year 2021. 51 Wisconsin nursing homes received the SQC designation in 2021.** SQC deficiencies constitute: immediate jeopardy to resident health or safety; a pattern of or widespread actual harm that is not immediate jeopardy; or widespread potential for more

Immediate Jeopardy. This deficiency exists when a situation caused (or is likely to cause) serious injury, serious harm, impairment or death to a resident receiving care in the facility AND facility practice makes it probable that similar actions, situations, practices, or incidents will occur again. Immediate corrective action is needed. The nursing home received **3 Immediate Jeopardy deficiencies** in 2021.

<u>DEFICIENCY</u>	<u>CATEGORY</u>	<u>SURVEY DATE</u>
Free Of Accident Hazards/Supervision/Devices	QC	02/09/2021
Quality Of Care	QC	02/09/2021
Cardio-Pulmonary Resuscitation (Cpr)	QL	09/29/2021

Significant Correction. This deficiency exists when a situation resulted in a negative outcome that compromised a resident's ability to maintain or reach his/her highest practicable physical, mental, or psychosocial well-being. This nursing home received **0 Significant Correction deficiencies** in 2021.

Correction. This deficiency exists when a situation resulted in minimal physical, mental, or psychosocial discomfort to a resident and/or has the potential (not yet realized) to compromise a resident's ability to maintain or reach his/her highest practicable physical, mental, or psychosocial well-being. This nursing home received **5 Correction deficiencies** in 2021.

SECTION 2 - NURSING STAFF TURNOVER AND RETENTION

This section provides two measures describing the rate of change among nursing employees from January 1, 2021, through December 31, 2021: a "turnover rate" and a "retention rate." The turnover rate is based on new hires during the year as a proportion of total staffing in a category. The retention rate is based on the proportion of staff in a category at the beginning of the year who are still employed by the end of the year. The formulas used to calculate nurse staffing turnover and one-year retention rates are explained in [Appendix B](#).

Rates are calculated separately for full-time employees, persons working 37.5 hours or more per week, and part-time employees, persons working less than 37.5 hours per week. An "NS" indicates the nursing home reported having *no staff* in that particular category. Registered nurses (RNs) are nurses who are licensed and hold a certificate of registration by the State of Wisconsin. In 2021, this nursing home had:

- **A turnover rate for full-time RNs of 80%**, vs. 46% statewide and 40% across all nursing homes with 100-199 beds.
- **A turnover rate for part-time RNs of 200%**, vs. 57% statewide and 53% across all nursing homes with 100-199 beds.

In some cases, the turnover rate might be artificially high because one position changes frequently throughout the year. For example, if a nursing home with ten nurses had one position that was filled by five people throughout the year, the turnover rate is 50% (5 divided by 10) even though nine of the ten nurses did not change. The "retention rate" captures a sense of the stability of staff outside of the positions that changed frequently. In the example just used, the one-year retention rate is 90% (i.e., nine of the ten nurses had worked at least one year).

In 2021, this nursing home had:

- **A retention rate for full-time RNs of 60%**, vs. 76% statewide and 78% across all nursing homes with 100-199 beds.
- **A retention rate for part-time RNs of 0%**, vs. 69% statewide and 75% across all nursing homes with 100-199 beds.

Licensed practical nurses (LPNs) are nurses who are licensed by the State of Wisconsin as practical nurses. At this nursing home in 2021, there was:

- **A turnover rate for full-time LPNs of 67%**, vs. 51% statewide and 68% across all nursing homes with 100-199 beds.
- **A turnover rate for part-time LPNs of 25%**, vs. 59% statewide and 63% across all nursing homes with 100-199 beds.
- **A retention rate for full-time LPNs of 33%**, vs. 75% statewide and 77% across all nursing homes with 100-199 beds.
- **A retention rate for part-time LPNs of 75%**, vs. 69% statewide and 70% across all nursing homes with 100-199 beds.

Nursing assistants (NAs) provide direct personal care to residents, but are not registered nurses or licensed practical nurses. At this nursing home in 2021, there was:

- **A turnover rate for full-time NAs of 46%**, vs. 69% statewide and 66% across all nursing homes with 100-199 beds.
- **A turnover rate for part-time NAs of 136%**, vs. 85% statewide and 89% across all nursing homes with 100-199 beds.
- **A retention rate for full-time NAs of 69%**, vs. 70% statewide and 71% across all nursing homes with 100-199 beds.
- **A retention rate for part-time NAs of 36%**, vs. 60% statewide and 63% across all nursing homes with 100-199 beds.
